

CONCENTRATED DESCALER

Legend Concentrated Descaler is an effective rust and limescale remover. Its powerful acids remove the heaviest contaminants such as hard water scale from toilets and urinals and is suitable for use on ceramic floor tiles around swimming pools. Concentrated Descaler also effectively cleans concrete, bricks and paving slabs.

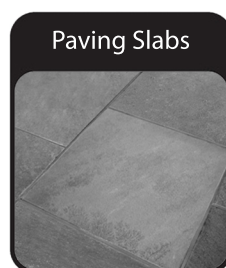

Pack size: 4x5L Pine Code: LEGM-2108-6X1

Urinals

Brickwork

Paving Slabs

Concrete

How To Use

Concentrated Descaler is a heavy-duty descaler, concrete and brick cleaner, also suitable for de-rusting metals. Also ideal for etching concrete floor surfaces prior to painting.

Dilution Rate:

1L per 5L of water

For Best Results

Wear rubber gloves and eye protection.

Dilute with water

Concrete slabs:

Pour the solution onto the concrete slabs and use a stiff broom to clean the surface.

Rinse off with clean water.

Brick:

Brush on the solution and work into the surface. Rinse off with clean water.

Urinals: Close the toilet to the public. Open windows and doors to allow sufficient ventilation.

Pour Concentrated Descaler directly into the down pipe of the urinal.

Be careful not to spill any Concentrated Descaler onto stainless steel surfaces.

Allow Concentrated Descaler to stand in the pipe for up to 10 minutes before flushing with clean water.

Limescale: Apply using a brush, or if item is small enough it may be immersed in the solution.

Rinse off thoroughly with clean water.

Rust Remover:

Brush solution onto the surface, allow sufficient contact time for Concentrated Descaler to dissolve the rust. The metal surface should be protected after application to prevent re-rusting

DO NOT USE ON STAINLESS STEEL, MARBLE OR ENAMEL SURFACES.

HEALTH & SAFETY

Please refer to the MSDS for full health and safety information.

DO NOT INGEST

DO NOT MIX WITH OTHER CHEMICALS

KEEP OUT OF REACH OF CHILDREN
