Taps

How to Use

Kettle Descaler removes limescale from all types of kettles. It is safe to use on stainless steel and plastic surfaces. Concentrated formulation, dilute to use. Wear appropriate PPE when using Kettle Descaler.

For Kettles:

1L kettle: add 100ml

2L kettle: add 200ml

Add water to kettle until approximately 1/4 full. Add the premeasured required amount of Kettle Descaler to the water and leave for an adequate time to dissolve all the limescale. This may vary depending on the amount of scaling. Rinse with clean water at least 3-4 times before use. For very heavy build up of scale a second application may be required.

For taps and appliances:

Use neat on the surface and leave to work. A small brush may be used to agitate if necessary to help clean stubborn stains or water scale.

HEALTH & SAFETY

Please refer to the MSDS for full health and safety information.

DO NOT INGEST
DO NOT MIX WITH OTHER CHEMICALS
KEEP OUT OF REACH OF CHILDREN
