

LIQUID LAUNDRY

Laundry Detergent

Legend Liquid Laundry is a high performance laundry detergent for use in professional auto-dose programmes and hand washing. Liquid Laundry is excellent at removing stains and insuring the continued brightness of colours. Liquid Laundry is suitable for use in all types of commercial and domestic washing machines in both soft and hard water conditions and is effective in hot, warm and low temperature washes.

Pack size: 4x5L Code: LEGM-AL0200-4N
10L Code: LEGM-AL0201
20L Code: LEGM-AL0202

How to Use

Liquid Laundry is a fully built high performance laundry detergent, formulated to combat protein stains on all types of linen including cottons, polyester and synthetic fibres. With built in optical brightener to make whites look even whiter. Highly fragranced to give washed laundry that fresh clean smell. Liquid Laundry is ideal for automatic dosing into laundry machines and also suitable for hand washing. It is effective at low temperatures and is safe to use on mixed colour washes.

Dilution Rate:
10ml per 1Kg of dry laundry

Use through an automatic dosing equipment. The dosage rate should be correctly set for the size of machine and water hardness. Ensure that dirty laundry is separated into correct loads of similar types and wash at the correct temperature. Care should be taken when washing delicate laundry, in particular woollens. Select the correct wash cycle and temperature. Use in conjunction with Fabric Softener.

Pre-soaking stained garments: Place garment in a bowl and fill with cold water, enough to cover the garment. Add Liquid Laundry and agitate. Leave to soak for up to 12 hours before machine washing or hand washing.
