

## NON BIOLOGICAL

### Liquid Laundry

Legend Non Biological is a high performance detergent for professional auto-dose programmes and hand washing. Non Biological is suitable for use in all types of commercial and domestic washing machines in care homes and hotels. Non Biological continues the brightness of colours and is excellent for stain removal. Effective in soft and hard water conditions and in hot, warm and low temperature washes.

Pack size: 4x5L Code: LEGM-AL0230-4N  
10L Code: LEGM-AL0231  
20L Code: LEGM-AL0232

### How to Use

Non Biological is a fully built, non-biological, high performance laundry detergent, formulated to combat protein stains on all types of linen including cottons, polyester and synthetic fibers. Based on synthetic surfactants, with built in optical brighteners to make whites look even whiter. Highly fragranced to give washed laundry that fresh clean smell. Non Biological is ideal for automatic dosing into laundry machines and also suitable for hand washing. It is effective at low temperatures. Safe to use on mixed colour washes.

Dilution Rate:  
15ml per 1Kg of dry laundry

Use through an automatic dosing equipment. The dosage rate should be correctly set for the size of machine and water hardness. Ensure that dirty laundry is separated into correct loads of similar types and wash at the correct temperature. Care should be taken when washing delicate laundry, in particular woollens. Select the correct wash cycle and temperature. Use in conjunction with Fabric Softener.

Pre-soaking stained garments: Place garment in a bowl and fill with cold water, enough to cover the garment. Add Non Biological and agitate. Leave to soak for up to 12 hours before machine washing or hand washing.

### HEALTH & SAFETY
