

HD2000 Decarbonising Powder

HD2000 is an economical, versatile, blended alkaline degreasing powder. It is ideal as a soaking agent. HD2000 is fast and effective at removing carbon deposits from cooking utensils.

HD2000 is suitable for use in soak tanks, and as a treatment for grease traps and to rapidly treat blocked drains. It is suitable for use in both hard and soft water areas.

Pack size: 10kg Code: AM0280

WARNING: HD2000 IS NOT SUITABLE FOR USE ON SOFT METALS SUCH AS ALUMINIUM OR ZINC

Soak Tanks

Grease Traps

Oven Racks

Baking Trays

How To Use

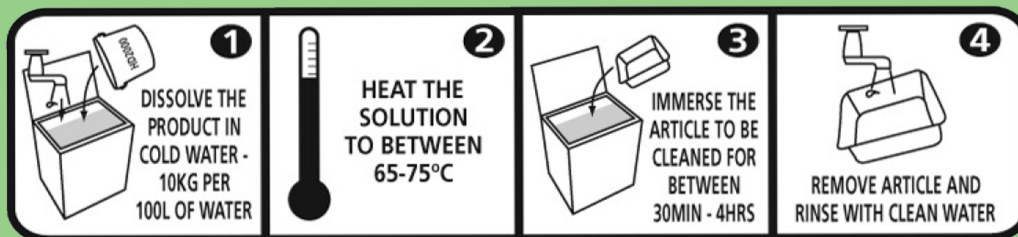

HD2000 is a caustic based degreasing powder which is effective for the heaviest cleaning and degreasing operations. Ideal for use in heated soak tanks for removing stubborn carbon deposits from racking, trays etc.

Drains and Grease Traps: 1KG of HD2000 per 10L of cold water.

CIP Cleaning: Dilute 1 part HD2000 with up to 100 parts of cold water, and circulate at 65°C for 15 to 20 minutes. After treatment wash out the system with clean water.

Soak Tank: Dissolve the product in cold water, 10KG of HD2000 per 100L of water. Heat the solution to between 65-75°C. Immerse the article(s) to be cleaned for between 30 minutes and 4 hours, dependant on soiling, before removing and rinsing thoroughly with clean water.

WARNING: HD2000 IS NOT SUITABLE FOR USE ON SOFT METALS SUCH AS ALUMINIUM OR ZINC
