How To Use

Machine Dishwash Detergent is highly concentrated and suitable for use in soft and hard water conditions. Designed for use in cabinet dishwashers fitted with automatic dosing equipment. Efficiently removes tea and coffee stains, food debris, cooking oil, grease and fats from crockery and cutlery.

For Best Results:

Dilution Rate:

Soft water 1.5-2ml/L

Medium-hard water 3.5ml/L

Hard water 4-4.5ml/L

Wear eye protection and gloves whilst carefully placing the detergent tube inside the container, making sure that the tube goes right to the bottom of the container. Ensure the automatic dosing unit is switched on. For best results ensure the automatic dosing unit is correctly set for the water condition. If the dishwasher is fitted with a water softener ensure it is regenerated on a regular basis with granular salt.

**WARNING: NOT SUITABLE FOR USE ON SOFT METALS SUCH AS ALUMINIUM OR ZINC
DO NOT USE FOR WASHING BY HAND**
